

Moving Toward Primetime pt.2

I decided to install BuddyPress onto my website, to make it a more social environment and give people a better experience. After installing the plugin, I changed some code in my custom theme to put widgets into the sidebar. It was then a simple process of putting some of the widgets that were provided with BuddyPress into the sidebar and configuring them to work the

Moving Toward Primetime pt.2

way that I wanted them to. Here are some pictures of the widget customization.
